

PATCH 57.4.1

Scheduled to be released to the field, Friday, June 24, 2005 at 4:00 P.M. CT

Contains Database Modifications.

REPAIRS

PR/CRT NBR	REPAIR	Initiated By	Critical Function
TD 10066	<p>Summary: Addendum to SCR 04-12019-DOD. The wrong pre-tax waiver values were flowing to position 86 in PAY500 during SQT testing.</p> <p>Resolution: Modified code to check when pre tax waiver in Health Benefits is updated and flow NOA 'HBP' to payroll. A value of 'W' is written to PAY500 when pre tax waiver is changed to Yes and 'R' when changed to No. For RPA, manual updates, and the IVRS process.</p> <p>Note: On the element change of Pre-Tax Waiver and Child Equity, if "UPDATE" mode is used, the element effective date will change to the effective date of the action. This will change the FEHB Start Date that flows on the PAY500 in position 138 (FEHB Start Date). If "CORRECTION" mode is used the element effective date does not change, therefore the FEHB Start Date will not change. On IVRS changes, the HPB is an "UPDATE" to the system so the FEHB Start Date will change.</p>	CPMS	Benefits
PR 21436	<p>Summary: Cancelled TSP election not populating previous election on Pay500.</p> <p>Resolution: Modified the payroll flow for the delete next change option for TSP to flow current amount and rate instead of zeros.</p>	AF	Benefits
