

PATCH 51.4.2

Scheduled to be released to the field, Tuesday, November 24, 2003 at 6:00 P.M. CST

Database and client load changes.

REPAIRS

PROBLEM REPORT NUMBER	REPAIR	Initiated By	Critical Function
Remedy 15285	Summary: PAD Performance data interface job is too slow (Navy NE). Resolution: Modified the procedure to use proper index during retrieval, and dropped an unused index that was slowing the update process.	Oracle	Pay Interface
CRT 03-8618-DoD	Summary: Modified the DMDC-CAC Daily Feed to provide all NOA Codes when any NPA is processed. Changed the file name from 'LN' to 'LNF', removed three spaces from the file type field in the NAF extract. Changed the health enrollment plan for APF and NAF records. Added logic for 2nd NOA Code to populate in the process when the NOA is 001 or 002. Corrected the order of updating variables for NOA display on cancellations/ corrections.	CPMS	DMDC CAC
