

## PATCH 57.1.1

Scheduled to be released to the field, Sunday, May 15, 2005 at 9:00 A.M. CST

Database changes only.

### REPAIRS

PR/CRT NBR	REPAIR	Initiated By	Critical Function
Remedy 22752	<p><b>Summary:</b> Comments missing from Civilian Inbox after Family Pack J.</p> <p><b>Resolution:</b> Modified the Civilian Inbox to accommodate the user comment moving from the WF notifications table to the WF comments table in Family Pack J.</p> <p>A script that ran as part of that patch only migrated the user comment for OPEN notifications, so the view that the civilian inbox is based on is constructed to retrieve comments from the new location as well as the old notification when users are querying notifications closed prior to Family Pack J.</p> <p>Will process the migration script again, since comments saved using civilian inbox after Family Pack J and prior to this fix, are currently being saved erroneously to the old location. Rerunning that script will resynchronize everything. All comments after this patch will be created in the WF comments table.</p>	AF	In Box
