

PATCH 50.18.1

Scheduled to be released to SQT Friday, October 24, 200, at 4:00 P.M. CDT

Scheduled to be released to the field, Sunday, October 26, at 9:00 A.M. CST

Database changes only. This patch will require a bounce of the databases, concurrent manager, and Apache.

REPAIRS

PROBLEM REPORT NUMBER	REPAIR	Initiated By	Critical Function
	<p>Summary: CPMS requested LM to perform data validation on the application tables at all sites, and to produce logs for all the validation results.</p> <p>Resolution: Developed PL/SQL routines to validate personnel data against respective flex_value_sets defined in the flex fields and create a log in the ghr_process_log incase</p>		
	Data Validation of an invalid data.	CPMS	Other
	<p>Summary: LN Separation RPA's would not complete the HR update and System just reverts back to the first page of the RPA. Wrong date format in the person DDF history records had caused the process to abort without any error.</p> <p>Resolution: Update all the dates in CIVDOD_PER_LN_GROUP_2 to canonical</p>		
	Remedy 13973 format.	Army	Separations
Oracle Patches			
	<p>Summary: Oracle autoconfig configuration utility.</p> <p>Resolution: Made modifications to the Oracle Apache environment to eliminate errors with the autoconfig utility.</p>
