

PATCH 51.7.1

Scheduled to be released to the field, Monday, December 15, 2003 at COB.

Database change only.

REPAIRS

PROBLEM REPORT NUMBER	REPAIR	Initiated By	Critical Function
Remedy 15464	Summary: Requisitions not flowing to RESUMIX (error in interface process). Resolution: Modified code on RESUMIX server to reduce input data length prior to insert. Replaced the specific clear text value of 'None/Unknown (No longer valid for use)' with the appropriate clear text, instead of just truncating the value. Also, added code to report when the input value is changed to fit the destination field size.	AF	RESUMIX
