

PATCH 54.14.1

Scheduled to be released to the field, Thursday, December 9, 2004 at 2:00 P.M. CST

Database changes.

REPAIRS

PROBLEM REPORT NUMBER	REPAIR	Initiated By	Critical Function
Remedy 20525	Summary: Productivity Button disappears once "OK" is clicked at the Error Message received on the main screen. Resolution: This is a correction for the form error that appeared during the CSU Web Enabling effort in the AF production box. The productivity button is not visible in the AF CSU 03 and AF SQT box. Changed code to alter the enabled property of the productivity button only if the button is visible. This should prevent the form error reported.	AF	CSU
CRT 04-23386- DoD	Summary: Changed the logon form to remove the connect string. Changed all references to the connect string in other forms to look at the global variable derived from the database name at the time of logon instead of the connect string.	CPMS	CSU
