

PATCH 50.15.1

Scheduled to be released to the field, Tuesday, October 14, 2003 at 6:00 P.M. CDT

REPAIRS

PROBLEM REPORT NUMBER	REPAIR	Initiated By	Critical Function
Remedy 13873	<p>Summary: DMHRS interface file is blank when it tries to FTP.</p> <p>Resolution: Modified the extract routine to take into account the new column lengths introduced in 11i. Also, added process log error reporting, which will allow continuation to the next person should future data problems be encountered. Note for exits administrators: Process log must now be reviewed at each region after the DMHRS extract has been run (program name = 'DMHRS') to ensure that no new data problems surfaced.</p>	CPMS	UNIX
Remedy 13909	<p>Summary: CAO & Inter Agency Transfer notifications not received by Gain GB.</p> <p>Resolution: Gaining Agency submitted Change in Appointing Office and Inter Agency Transfer Requests, they are not being received in the gaining agency's CAO group box and data has to be manually input. The Table Structures on the EXITS server was not consistent with the Structures at the regions. Also, the incorrect version of package civ_int_cao was on the EXITS server. The following corrections were made.</p> <ol style="list-style-type: none">1. Dropped all CAO/Inter Agency tables at the regions and at the EXITS server.2. Recreated the tables using the new scripts that are consistent with each other.3. Promoted the correct version of package civdod_int_cao to the EXITS server.	DeCA	CAO
Remedy 14472	<p>Summary: Cannot update HR when processing separations.</p> <p>Resolutions: Corrects hire date for post M2M Army employee records where the date start in the Periods Of Service Table does not match employee record first effective start date. This action affects approximately 56k employee records. Run time for this fix is expected to be less than 15 minutes.</p>	Army	Separations
