Remedy 14341	<p>Summary: RECON erroneously reports 4039 records as mismatches.</p> <p>Resolution: User identified three separate recurring errors (locality percent, part time indicator. Retained information – retained pay plan, retained grade, and retained set, retained pay table id). All were due to separate problems.</p> <ol style="list-style-type: none"> 1. The * was being set on the retained information (for one employee and then not being cleared for all subsequent employees, this was probably causing the most errors on the recon report. 2. The * was begin set on locality percent due to the wrong data being compared. If retained pay plan was not equal then locality percent was being set. 3. Part time indicator was being set for the wrong employee. If part time indicator failed the edits for employee A, the * was being set on employee B. 	Army	Pay Reconciliation
