

PATCH 51.15.1

Scheduled to be released to the field, Tuesday, January 20, at 6:00 P.M. CST

Database changes only.

REPAIRS

PROBLEM REPORT NUMBER	REPAIR	Initiated By	Critical Function
Remedy 15754	Summary: Blank Duty Station on assignment, position and pay500. Resolution: This script finds assignments with null location ids and populates them by finding the most recent date-tracked assignment row with a location id and using that location id. It then updates any RPAs (and shadow) with missing duty station location id for that person during the timeframe of the date-tracked assignment record. Copying the location id from the previous date-tracked assignment row has been deemed safe, since actions that actually moved someone to a new position were not exhibiting the problem with null locations.
