SCR 03-6481-DOD	<p>Summary: The PAY500 view has been modified to reflect search fields for the data provided below. The search capability will allow for a minimum of one search field or a combination of fields. Specifically, the user would be able to search by SSN, or could search by NOA only, or Effective Date only, or a combination of NOA and SSN or NOA and Effective Date etc. The ability to search by SSN only will remain unchanged as well as the ability to populate the view with NO query specified (to view the entire table in the order currently provided). The following fields have been added to the search capability:</p> <ul style="list-style-type: none"> Nature of Action (NOA) Effective Date Servicing Office ID (SOID) Payroll Office ID (POID) Transaction Creation Date <p>There are a couple of things to be aware of. A count button was created to allow for a popup that will give you the choice of processing the query as you currently have it or you can refine the query if desired. This is the solution for the requirement to provide a popup message when the query will return an excessive amount of records. The count button will provide the number of records retrieved during the query. It differs from the original requirement in that the user is in control, rather than the system.</p>	CPMS	Other

	As before, when regeneration is complete and the record is saved, the SSAN is placed in criteria and the data is retrieved. This is done to allow viewing of the regenerated Pay 500 record.		
NAF Only			
Remedy 14304	Summary: Federal tax effective date in NAF Army Unique DDF for AF records. Resolution: Corrected the problem where the form was auto-populating at the form level.
