

## PATCH 50.8.1

Scheduled to be released to the field, Wednesday, September 10, 2003 at 6:00 P.M. CDT

Database changes only.

### REPAIRS

<b>PROBLEM REPORT NUMBER</b>	<b>REPAIR</b>	<b>Initiated By</b>	<b>Critical Function</b>
Remedy 14503	<b>Summary:</b> Positions in DCPDS were invalidated for unknown reason. <b>Resolution:</b> A script has been prepared to correct the invalidated Positions that were created during the implementation of Patch 50.8.	Army	Positions
Remedy 14510	<b>Summary:</b> Paris SF50 process runs excessive amount of time without completion. <b>Resolution:</b> The problem was caused because the Concurrent program "Delete Uncompleted RPAs" wiped out the link between corrections and cancellations and the originating RPA. Created a script to re-link the corrections and cancellations to the originating RPAs. Changed the RPA Deletion program so that it only nulls out the appropriate Request Id.	AF	External Interfaces
