REPAIRS

PR/CRT NBR	REPAIR	Initiated By	Critical Function
TD 9894	Summary: Delete booking call for report "CIVLN_SUSP2" to eliminate "No event found" errors in Suspense runs. Resolution: Booking call deleted.	CPMS	Suspense
TD 10050	Summary: List Of Values Missing in PTID Mass Change Process for CIVDOD SysAdmin Region GUI. Resolution: Five existing bugs were fixed for this test director ticket. All of these were related to edits for the Education SIT: (1) Semester Hours and Quarter Hours are now calculated differently by using multiplier of .67 on quarter hours before edits fire that deal with the range of hours allowed for each education level. (2) The earliest year allowed for the Education SIT start date is now 1939. (3) The Academic Institution is now required if the education level is 10. (4) The Academic Institution is now required if the education level is 13-22. (5) The error message CIV_EDUC_LEVEL_CIV_15 now says the Instructional Program is required if the education level is 06, 10, or 13-22.	AF	Training
TD 10052	Summary: HR-Training, Reports, IDP, education is not defaulting to the highest level. Resolution: The Individual Development Plan report now shows the highest education level in any Education SIT for the employee rather than the most recent education level on file.	CPMS	Training
Remedy 17704	Summary: Secure View not working on custom NPA and RPA Actions. Resolution: Modified Germany Air Force and Army reports to retrieve Citizenship code, Employee ID, Part Time Hours and Payroll Number for advance print of appointment actions.	CPMS	System Security

Remedy 18471	<p>Summary: The CPDF Dynamics report is not pulling education data for all records</p> <p>Resolution: The CPDF Dynamics Report was reporting Education Information from the GHR_PA_REQUESTS instead of US Fed Education SIT. Now the Educational details are taken from the US Fed Education SIT. Oracle TAR 4084432.999, Bug 3958881.</p>	NGB	Reports
Remedy 19713	<p>Summary: Unable to un-eliminate positions.</p> <p>Resolution: The July 2004 Family Pack H and the August Supplemental patch included functionality that disabled the ability to un-eliminate (restore) a position using the delete next process. This release corrects this problem. The user can un-eliminate (restore) the position using the delete next process:</p> <ol style="list-style-type: none"> 1. Change the effective date to the day before you eliminated the position. 2. Click the Delete icon and confirm in the dialog that you want to delete the position. 3. Choose the Next, Remove Next Change delete option. 4. Save your work. Re-query the position. The Hiring Status is restored to Active. This procedure removes the history record of the position's elimination, but keeps all other updates for the position that occurred prior to the position's elimination, and retains the position's validation status. <p>Oracle TAR 4153655.999, Bug 4258408.</p>	AF	Position
Remedy 19736	<p>Summary: Creditable Military Service is not showing on the CPDF output.</p> <p>Resolution: Previously, the CPDF Status Report did not include the Creditable Military Service codes. Creditable Military Service now reports on all employees (other than re-employed Annuitants) if you have processed an accession or conversion personnel action with an effective date of October 1, 1986, or later. If any employee does not have Creditable Military Service, then 0000 as Creditable Military Services is reported. Oracle TAR 4169517.999, Bug 4060669.</p>	NGB	Reports
Remedy 20147	<p>Summary: The CPDF Dynamics Report show spaces for the prior Locality Adjustment.</p> <p>Resolution: Corrects when a DoDEA employee changed position, the employee's locality adjustment was reflected for the current/present position in the CPDF Dynamics Report. .
