PROBLEM REPORT NUMBER	REPAIR	Initiated By	Critical Function
Remedy 16726	<p>Summary: Retro NOA894 PAY500 shows wrong Organization Structure due to an NOA 790 action.</p> <p>Resolution: This is a follow on to the same script fielded in 52.16.1. There were some records where multiple NOA Codes for the same person and effective date existed. Those regenerations erred due to new transaction dates being exactly the same down to the second. This script was modified to guarantee unique time stamps. It will only process records which erred with ORA-0001 constraint errors during 52.16.1 patch; all previously regenerated rows will be bypassed. Program name in process log: "R16726_1" (previous one was "R16726").</p>	CPMS	Pay Interface

CRT 04-13472-DoD	Summary: A script has been prepared to recreate the PAY500 Regeneration Script for Non-Numeric NOA Codes - Retro Pay Adjustment. Process log program name is CRT04-13472-DOD	CPMS	Pay Interface
